The last version 1.06 had the ability to hack almost all CC & CS Suites products, but unfortunately did not work for the latest CC 2014 release made ... Unfortunately, this has been fixed, but it can still be done with code. To do this, you will need to create a new profile where you will be able to set version 1.06 as the default version. You should be allowed to use your old profile. If you use your old profile, you also
